Environment

Environmental policy

Environmental Policy – ISO 14001 was achieved in September 2001

At Nicholson & Bass Ltd we are committed to enhancing our environmental awareness, recognising that the management of environmental affairs is an integral part of modern business. We have adopted a policy of continual improvement in all our printing and distribution activities, regularly reviewing and auditing our compliance with regulatory requirements.

To meet our environmental objectives and targets to avoid, control and reduce pollution we will:

- Seek to minimise the production of waste through a sustained program of recycling and re-use, optimising our efficiency of resource use.
- Ensure all waste is disposed of in the most environmentally friendly manner, reducing the volumes of non-hazardous land fill. Dispose of industrial chemicals according to recommendations in current legislation.
- Save energy by implementing correct management procedures.
- Identify and reduce solvent vapour emissions harmful to the environment.
- Work with customers and suppliers to ensure continued improvements in our environmental performance.
- Develop a programme of education and training focussed specifically on environmental

Nicholson & Bass Ltd recently installed an automated waste extraction to a compactor system. This has improved our efficiency in our waste management.

Currently we are investigating

energy renewables with Renewables Ireland.
solar and wind generated energy.
Working to identify our carbon emissions.
